# Android Phone and Tablets

For Android based phones, tablets, Chromebook and IoT devices, there are a number of options of e-mail clients. Some vendors supply their own developed email client however Google’s own GMAIL client is common across all legitimate android devices and we support this client.

## POP/IMAP

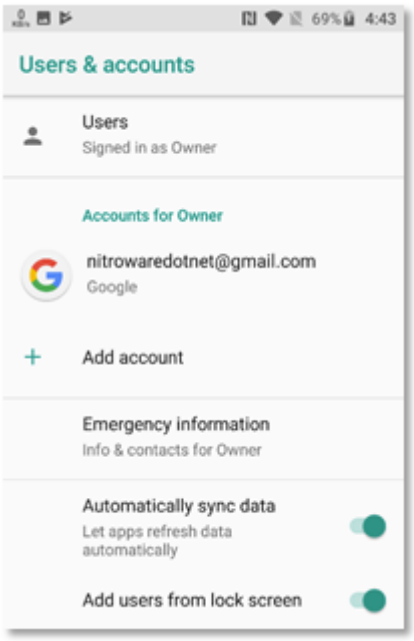

Figure 26 go to the add account function under 'Accounts' In Android settings, or Gmail

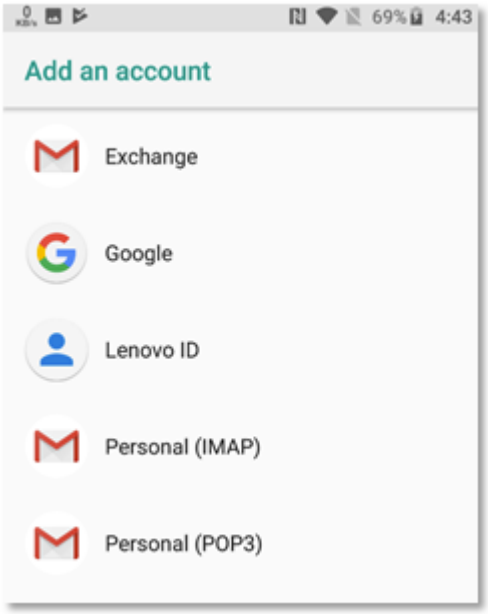

Figure 27 choose to add an IMAP account

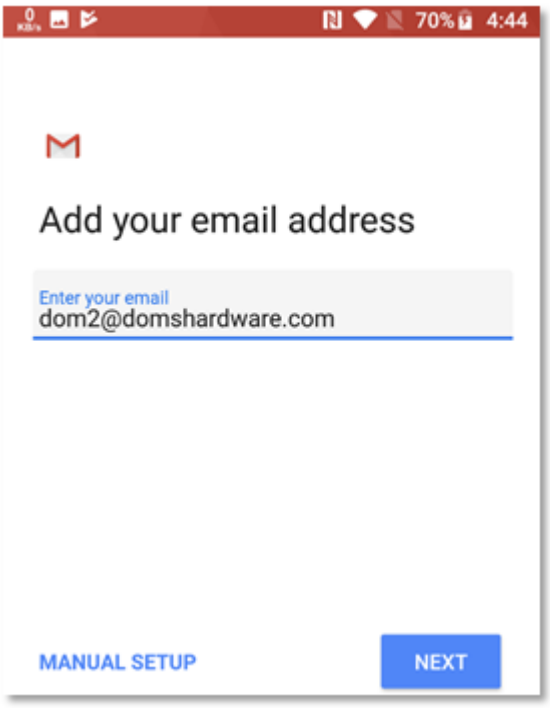

Figure 28 Once the email address is entered, Manual setup is unlocked. Choose **MANUAL SETUP**

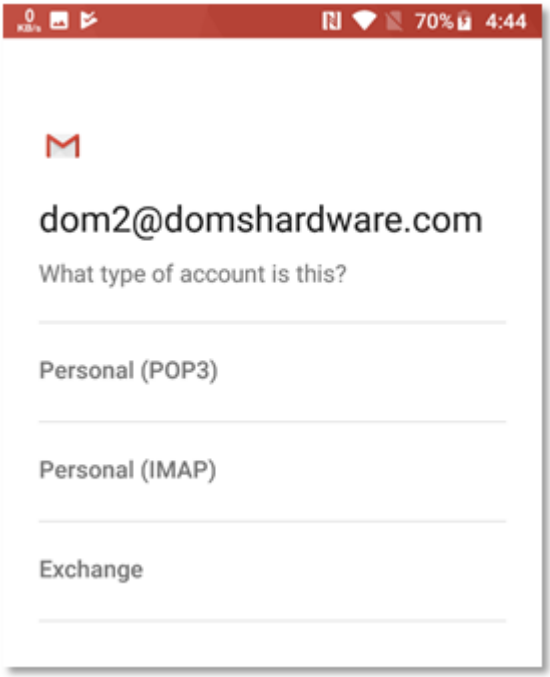

Figure 29 choose IMAP account. Optionally you may choose POP3

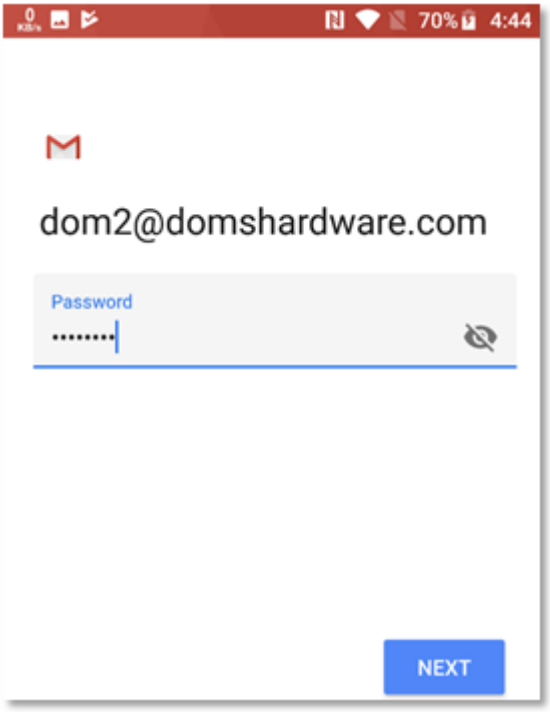

Figure 30 enter the password for the IMAP email account you wish to setup

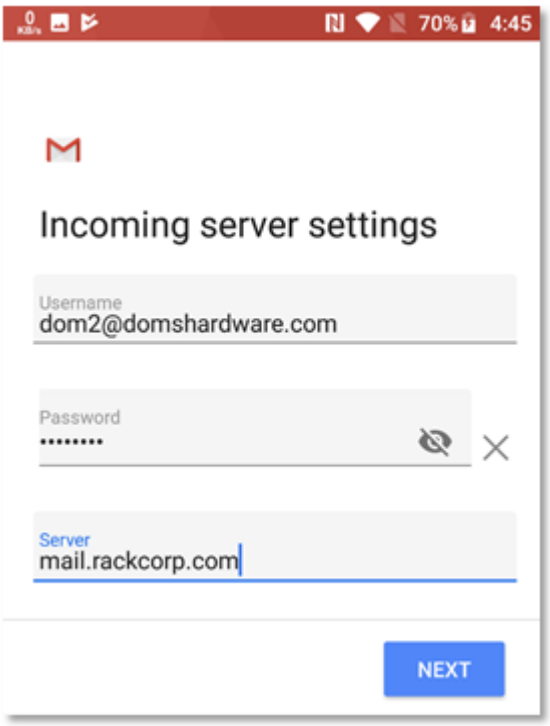

Figure 31 change the **INCOMING** mail server to **mail.rackcorp.com**

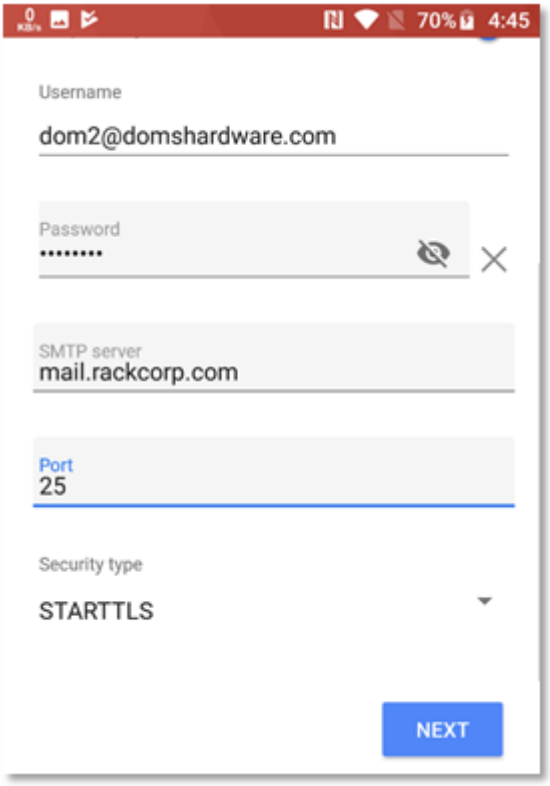

Figure 32 change the **OUTGOING** mail server to **mail.rackcorp.com**. **Change** the port to 25 and security to **STARTTLS**

If you are using our Mongolian servers, please use **mail.mn.rackcorp.com** as the mail server.

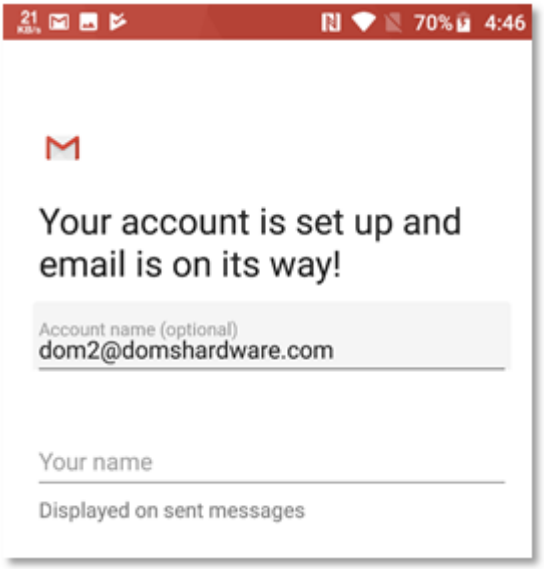

Figure 33 successful account configuration will result in a success message

# Exchange

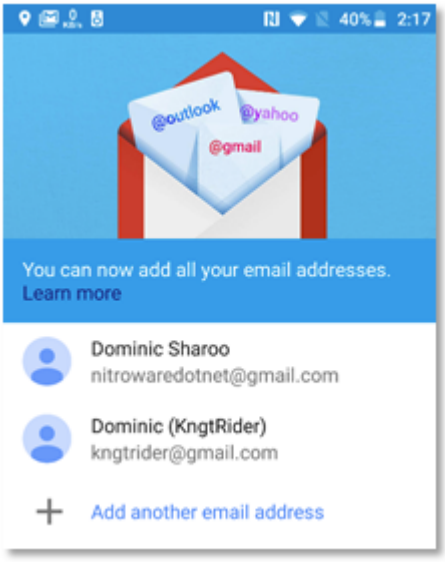

Figure 34 within GMAIL, choose add account or add another email address
